探討冷鏈物流的發展 2020年10月29日

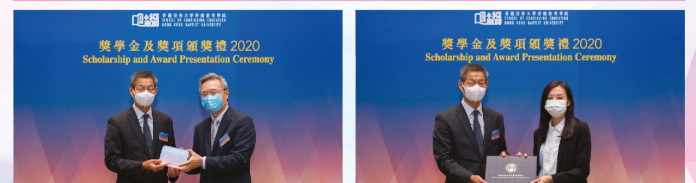

由於新型冠狀病毒在全球大流行，現今冷鏈物流變得備受關注，而業界人士正考慮如何提升冷鏈物流之安全性及營運效率。是次疫情改變了不少人的日常生活習慣，以及公司營運模式。鑑於現時醫藥及食品物流之急切需求，全面的冷鏈服務需求將會大大提升，包括冷凍倉庫及溫控運輸，所以一套完善的全球冷鏈系統將會是今後的大勢所趨。一方面來說，冷鏈數據化將會不斷普及，以增加資訊透明度及營運效率，並確保能全面監控貨物溫度偏離。而另一方面，建立一個高韌性的冷鏈管理模式以降低不同風險對企業之不良影響亦是未來業界大方向。

網絡研討會：貨運保障新推介 2020年12月3日

It was a great honour for Marsh (Hong Kong) Limited to speak at HKLA webinar about “開源節流” how you acting as a freight forwarding and logistics service provider can reduce liability claim costs “節流” by using shipper’s interest cargo insurance solutions (SII). This allows you to assist your customers in procuring cargo insurance on a specific shipment basis. At the same time, it shifts your B/L liability to the cargo carriage from your forwarding operator’s liability insurance policy to your SII policy. That would reduce your costs and expenses in terms of liability compensation and claim handling time as well. Importantly, it also allows your customers to get full invoice-value compensation in a short time (saying no more than 1 month). For “開源” – Increase Profits, our scheme partner – Tokio Marine Insurer shared how to register as an insurance agent and gain profit margin from offering SII solutions to customers. Feel free to touch base with Marsh and Tokio Marine to find out more information about our SII scheme and insurance agency application. Thank you.

HKLA Webinar: Warehouse Layout Design Processes on 18 December 2020

While people are fighting the pandemic, the e-commerce, cold chain and vaccine logistics are the major concerns for most logistics practitioners in these days. Out of the routine, a webinar themed “Warehouse Layout Design Processes” was held on 18 December 2020. The processes of warehouse space estimation, layout design, storage and picking systems decisions were introduced in a bit over an hour. The objective of the sharing was to remind the warehouse operators or managers how the warehouse size and layout were affected by the goods storage and picking system applications. However, the most

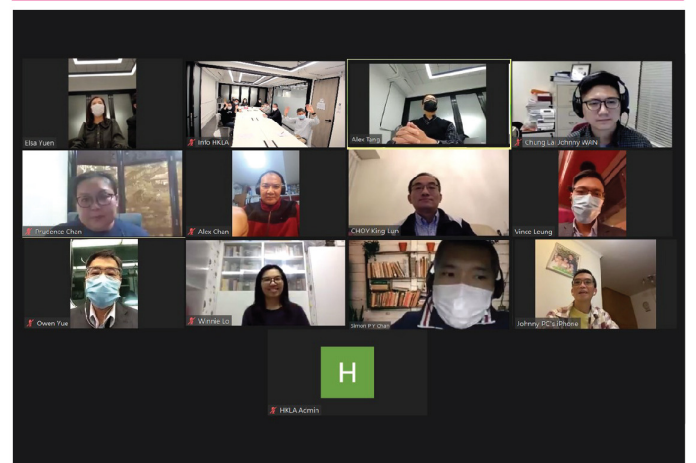

important of all, the consideration of the utilization rate, the clear ceiling height, the operating factor and space of the warehouses were also highlighted. It was unfortunate that the seminar was overrun and not face-to-face. The lack of interactive discussions and experience sharing was definitely a little regret. Audiences are strongly recommended to send in their questions and comments to us for further discussion.

The 19th Annual General Meeting

The 19th Annual General Meeting (AGM) was held on 17 December 2020. Amid the COVID-19 pandemic, this year’s AGM was specially arranged via live streaming with 18 members participated online and offline.

In the meeting, the President reported the achievements of the Association in this difficult year, such as hosting the 10th Hong Kong Logistics Forum, launching series of webinar courses subsidized by LOGSCOUNCIL, developing cold chain management standards & practice guidelines collaborating with HKQAA.

Thanks to the continued support from our members, the Treasurer reported an extraordinary good news of the Association, which achieved a surplus financial record in 2020. Last but not least, the Executive Vice President announced the 2021-2022 nomination of new Council, Honourable President and Advisors.
