Taiwan Study Tour

21 to 24 April, 2016

This Taiwan tour organized by the Hong Kong Logistics Association, provided comprehensive views into the latest technologies, operation workflows and facilities as well as the future direction of logistics development which can inspire the development of Hong Kong logistics industry.

Hsinchu Science Park was the first visit, which provided in-depth discussions in relation to the latest inventions and technologies, such as high sensitive RFID antenna, cloud, and Wi-Fi platform, to increase customer loyalty and productivity. Apart from studying advanced technologies, the Cold Chain, Good Manufacturing Practice (GMP) and Good Distribution Practice (GDP) facilities were investigated at Kerry TJ Logistics.

The state-of-the-art Automatic Storage and Retrieval System (ASRS), Warehouse Management System (WMS), and Standard Operating Procedures (SOPs) were well-developed in the cold storage facilities. On the other hand, Kerry TJ Logistics has been committed to developing a new concept of Automatic Distribution Terminals (ADTs). Through visiting the operations and key facilities, Kerry TJ Logistics showed their capability to provide the best logistics services and the development of future planning.

Amway Taiwan Company Limited was another amazing and valuable visit. We were guided to visit their logistics facilities, call centers, and physical stores. The distribution center adopted the latest technologies, including ASRS system, temperature-controlled warehouse and specialized production lines. In addition, Amway utilized the reverse logistics and returns management to enhance the effect of customer relationship management.

After the intensive site visits, we had a chance to experience the culture of Taiwan, by visiting the temple, Jiufen, Shifen, Taipei 101 etc.

This study tour was not only to acquire information and knowledge from the companies visited, but also to provide a platform for exchanging ideas to generate feasible solutions and ideas by all the professional members. In summary, the entire study tour was enjoyable and enlightening - giving inspiration to the Hong Kong logistics industry. Last but not least, we would like to show our sincere gratitude to Hsinchu Science Park, Kerry TJ Logistics, and Amway Taiwan Company Limited who shared their invaluable knowledge and experience.

Taiwan Study Tour Participant,
Mr. Paul Tsang, AOC Limited

高價值商品物流服務提升計劃項目研討會
(2016年5月20日)

由香港物流協會、香港理工大學工業及系統工程學系、香港物資採購與供銷學會及香港貨運物流業協會合辦的「高價值商品物流服務提升計劃」項目於5月20日在香港理工大學中舉行了「高級食材、電子商貿、名貴珠寶及鐘錶業的物流和供應鏈管理研討會」。

研討會內容非常豐富，香港物流協會會長陳鏡治工程師分享了中小企業物流服務供應商從何配合高價值商品品牌商，並提出多項高價值商品的物流及供應鏈增值服務。

研討會當日極受與會者歡迎，有超過200名中小企業管理層人員參與研討會。

香港物流協會委員會成員
黃樂恆工程師

HKLA Seminar:
Problem Solving Skill for Middle
Manager on 20 April 2016

The objective of the seminar training is to open up the mind-set of middle managers in dealing with every-day issues. Problems are inevitable and there are different ways to resolve them. If we are more rational, we can take the traditional approach to

handle problems starting with analysing the nature of the problem, considering various solutions, evaluating and finally recommending a solution. However, the proactive approach, as the subject of training, is to create an open environment to work on potential problems. This new mind set is introduced and hopefully of use to all participants.

Ir. Dr. Owen Yue - HKLA Secretary General

HKLA Seminar:
Supply Chain Role in Merger &
Acquisition on 26 May 2016

"Tax Inversion" has been a strong incentive for global companies to look for suitable M&A (Merger & Acquisition) opportunities since 1990's. After the 2008 financial turmoil and the subsequent worldwide QE (Quantitative

Easing) monetary policy, more M&A activities have been seen in the global market. Besides the significant reduction in profit tax, the low interest rates foster the best chance to grow the business quickly instead of the traditional slow organic growth rate.

M&A usually comes with cost control as it involves debt from banks, private equity funds or other financial institutions. As a back-end support function, Supply Chain may face the challenges of expenses control as well as the integration of various companies to a common platform. The positive side is that with a bigger business size, the opportunity for cost leveraging or bargaining is stronger. From an operational standpoint, Supply Chain folks need to be careful on handling the transition of M&A as it involves regulatory license transfer, proper stockpile decisions, different system & interface integrations, new suppliers, more complicated billing or logistics routing, certain hidden service risks and a more political working environment.

To tackle successfully, a positive attitude to embrace change is crucial. Learning quickly to upgrade oneself on new skills and be fair to each other during the people management are also essential to achieve a win-win situation.

Mr. Johnny Wong - HKLA Council member
