South Korea's port logistics seminar and luncheon on 30 August 2016

This seminar provided a much deeper understanding to South Korea's Ports. Besides the well-known Busan old and new ports, the Korean speakers also introduced different functions and responsibilities of Gwangyang Port, Incheon Port, Pyeongtaek Dangjin Port, and Incheon International Airport. Without this speech presented by Korean official department, as a foreigner I could hardly obtain and consolidate such

comprehensive information regarding how the Korean Government has planned so well serving various industries and the global markets. The investment environment, customs procedure and IT system support were also introduced, such as RFID, auto-management system of cut-off loading time, strengthened security, and reduced logistics costs. Business-friendly policies and infrastructure were nicely formed. I truly appreciate that HKLA has organized such an informative seminar - this is definitely beneficial to any players in the logistics industry.

Mr. Vince Leung, HKLA Co-opt Member

NEW MEMBERS

From period of August to September 2016

New Corporate Member
• Joseph Optima & Co. Limited • Alatas Hong Kong Limited

New Professional Member
• Ms. Tang Mei Chun, Iris • Mr. Chan Chun Hung
• Mr. Chan Hon Pan Harry • Ms. Bu Xiao Nan, Minnie
• Dr. Lo Man Fung Kelvin • Ms. Lam Siu Ching
• Ms. Luk Yuen Ting, Isabel

New Member
• Ms. Li Ka Man • Mr. Suen Pui Hei

New Student Member
• Ms. Zhang Mengjia • Ms. Gao Ge • Mr. Li Zhi Bin

HKLA 20TH ANNIVERSARY GALA DINNER SNAPSHOTS

Exchange Alumni 2016 – One Day Activities

On 23rd September 2016, eight overseas guests and exchange alumni who participated in our 20th Anniversary Gala Dinner visited the DHL Central Asia Hub and Cathay Pacific Cargo Terminal at Hong Kong International Airport and got an in-depth look at the facilities and operation. These two air cargo facilities are equipped with state-of-the-art technologies such as an automated sorting system and fully-automated materials handling system which improves efficiency by enhancing the handling capacity.

Operational staff from both companies briefed our guests on how the facilities operate by demonstrating interactive models. They also gave an introduction to how the daily flight schedules were monitored and each cargo tracked by the sophisticated systems. They followed this with a guided tour to let our guests have a close look at the air cargo facilities and real operations.

In general, our guests reflected that they were impressed with the technologies applied in these air cargo facilities and clearly understood why Hong Kong International Airport is a hub airport for air cargo industry.

Mr. Simon Chan

HKLA Chairman, Education and Training Committee

Visit to OOCL vessel on 6 & 23 August 2016

On Saturday 6 August, 2016, a group of 20 members led by the HKLA President Mr. Stephen Chan, visited the container vessels named OOCL Busan at Kwai Chung Container Terminal. It was an honor and privilege to be on board with the CEO of OOCL – Mr. Andy Tung and his senior management team.

The objective of the visit was mainly to understand the container vessel operations. We visited the ship control desk, engine room, captain's office, and staff canteen. The ship was operated by a crew of 26 staff on a 24 hours basis. The loading and unloading of containers on board could be completed in 6 hours.

In order to keep safe the ship and the crew members, routing with scheduled departure and arrival times are revised to cope with the weather conditions and political situations of the places along the voyage. Cost saving and efficiency improvements were the norm, and the ship has to depart from port early enough to reach the next destination on time, travelling at the slowest speed to save fuel consumption, i.e. 16.5 knots (31 km/h). It was interesting to know that armed guards were deployed when the vessel entered into the Somali area, and the speed of the vessel would be raised from 16.5 knots (31 km/h) to 24 knots (44 km/h). The vessel could accelerate up to its top speed of 49 knots (90 km/h) if the vessel was approached by suspected pirates.

The visit provided us with the knowledge of how a container vessel is operated. Information and experiences shared were so valuable which could not be learnt in class. Overall, it was definitely worth paying a visit - at least once in a life time.

Mr. William Mak, HKLA Professional Member

As the response was enthusiastic, a 2nd visit was arranged in the same month. This time our members visited a mega vessel "OOCL EGYPT" which could carry 13000 teu. We were well received and the captain was so kind to show every corner to us even his office. We are looking forward to arrange the tour again in the next year.

Ir. Elsa Yuen, HKLA Chairlady, Programmes & Recreation Committee

全國物流從業人員職業能力等級認證

香港物流協會為「全國物流從業人員職業能力等級認證」(原名:全國物流師職業資格認證)在香港的認可考試中心,此資格認證廣為內地物流業僱主接受。考試成功可獲頒發「物流從業人員職業能力等級證書」。考試分別於每年5月及11月舉行,詳情請聯絡本會或瀏覽本會網頁 www.hkla.org.hk。

如欲參加上述考試,請先電郵 info@hkla.org.hk 或傳真 852-34212477 考試報名表、學歷證明、成績單、工作證明及身份證副本至本會。審批成功後,便可帶同證件相片三張在辦公時間內到本會繳交考試費及購買有關參考書籍。
