Remarks:	This Course serves as an awareness training for the practitioners as well as those potential trainers. The essence on Cold Chain Practice Note will be introduced so that minimum standard of practice could be maintained in the cold chain industry. The next move is to prepare potential candidate as trainer or instructors at work. HKLA is taking initiative to ensure quality standard in practice throughout Hong Kong. An accreditation mechanism is to be introduced for perpetual good logistics practice of temperature control products. Details will be confirmed and announced later.
